
The Art and Science of Roofing.

DaVinci Roofscapes

Complete your masterpiece with

Meet the top of the line.

Once you've experienced the beauty, strength, ease and endurance of DaVinci Roofscapes, you'll be sold on the authenticity and flexibility of our tiles. DaVinci products can cost about 50% less than comparable wood or quarried slate and are backed by a 50-year limited warranty.

Unlike other synthetic roofing materials, only DaVinci shake and slate tiles can be customized to work seamlessly with your design. Our standard colors are available in 19 slate colors and 22 shake colors, which can be mixed for a custom look. We offer a variety of blends, or you can use our virtually limitless color palette to create a unique color for your project.

The benefits of *not* using the real thing.

Every DaVinci tile is 100% recyclable. Any excess materials from the manufacturing process are recycled for use in our starter tiles. We ensure that tiles are bundled efficiently for each project for less overall waste. Because our synthetic tiles are guaranteed to last for 50 years, natural resources are not sacrificed for frequent replacement as with cedar or quarried slate. And, just like you, we are extremely cognizant of our energy usage at our plant and in transport.

DaVinci Products

All DaVinci tiles are designed to realistically replicate the look of natural slate or wood shake without the weight, work or replacement worries. Choose from our industry-leading selection of tile widths and colors to create a natural appearance.

DaVinci Slate

DaVinci Slate is carefully engineered to provide the authentic look and durability of natural slate, while protecting the earth's natural resources and your budget. Available in 9 color blends and multiple widths.

Valoré Slate

Valoré Slate closely resembles the classic traditional slate tile found on upscale residences throughout the world, but requires none of the maintenance. Available in 4 color blends and 12-inch widths.

DaVinci Hand-Split Shake

Reminiscent of the texture of natural, hand-crafted cedar, DaVinci synthetic shake tiles feature the deep-grained surface of a premium shake. Available in 4 color blends and multiple widths.

DaVinci Fancy Shake

The clean smooth look of a machine-sawn shake gives our Fancy Shakes the appearance of a refined, pristine cedar shingle without all the maintenance. Available in 4 color blends and multiple widths.

Valoré Shake

Valoré Shake offers varied textures and profiles to create the natural visual shifts in color and shading that occurs with real, hand-split cedar. Available in 4 color blends and 9-inch widths.

Bellaforté

Belleforté is an eco-friendly way to replicate the look of authentic, natural slate with lightweight, self-aligning tiles for fast installation and precise placement. Available in 4 color blends and 12-inch widths.

Visit davinciroofscapes.com for a complete list of colors.

Turret Packages

At DaVinci, we've mastered the art of roofing a turret. We can create a custom-engineered turret package to meet the specifications of your design and we'll deliver it ready to install ensuring a perfect outcome.

DaVinci Roofscapes.

After a fire destroyed the Olde Liberty Station restaurant in Bedford, Virginia, the landmark building was rebuilt using Bellaforté fire-resistant tiles in Slate Black to perfectly replicate the original passenger rail station.

With the best interest of its students in mind, Mohawk Avenue School, part of the Sparta Township public school system in Sparta, New Jersey, chose aesthetically pleasing DaVinci Slate tiles in European Blend because of the product's impressive Class A Fire Rating and Class 4 Impact Rating.

Located just 1,000 feet from the ocean, the 12,100-square-foot Captain George's Seafood Restaurant in Kill Devil Hills, North Carolina, is protected from the unpredictable coastal weather with an impact-resistant DaVinci roof in Mountain Blend Hand-Split Shake.

The Villa Madonna, on the campus of Mount St. Mary College, was re-roofed with DaVinci Slate in Vineyard Blend to complement the 140-year-old building's Victorian style.

The Pinos Del Norte Condominium Complex, featuring multi-million dollar townhomes in prestigious Vail, Colorado, was completely re-roofed with DaVinci Shake tiles in Autumn that coexist beautifully with the rustic architecture and the environment.

DaVinci Roofscapes

A Renaissance in Roofing

Benefits at a glance:

- Easy to install, virtually maintenance-free, and backed by 50-year limited warranty
- Impervious to insects, rot, mold and mildew and impermeable to water
- Available in multiple widths and virtually infinite colors to customize your design

LEED® certification

All DaVinci products make a valuable contribution to the LEED® certification process in these categories:

- Heat island effect
- Construction waste management
- Regional materials
- Water efficiency
- Resources re-use

EcoBlend® Cool Roof Tiles

DaVinci EcoBlend cool roof tiles can be ordered for any DaVinci Roofscapes product and can help property owners save on energy costs, improve the comfort of the structure and mitigate global warming. Meeting the initial qualifications for a Cool Roof indicates that DaVinci EcoBlend products meet or exceed initial ENERGY STAR program requirements for 25% solar reflectivity and qualify for LEED-NC 7.2 Heat Island Effect. Final ENERGY STAR approval will be awarded to DaVinci EcoBlends after a mandatory three-year weathering/testing period. For a list of DaVinci EcoBlend cool colors, visit davinciroofscapes.com.

Help us recycle.

Scraps and cuttings from a project, as well as the tiles removed after the life expectancy (50 years) of the roof, may be returned to our plant for recycling. DaVinci will make arrangements and pay shipping for projects within 500 miles of the plant in Kansas City, Kansas.
