When it comes to roofing materials, you’ve got plenty of options—and none better than a DaVinci composite roof. DaVinci composite roofing is the blend of state-of-the-art materials with an artist’s touch. You won’t find a better looking or better performing roof at any price.

**STRENGTH**

- Asphalt
- Natural Slate
- Natural Shake

**WEAKNESS**

- Asphalt
- Natural Slate
- Natural Shake

---

**Top-notch performance and artistry that lasts a lifetime.**

Bellaforté slate & shake

---

**There is no competing with the artistry & performance of DaVinci Bellaforté**

---

**Don’t settle for anything less than perfection**

Why Bellaforté prevails over premium asphalt shingles
Bellaforté provides...

- Resilience in all weather
- A long life with low maintenance
- Bellaforté costs 49% less than heavy laminate over a 50-year span*
- A variety of options
- Easy installation

DaVinci Bellaforté Slate replicates a natural slate roof.

**Testing Summary**

**The choice is easy. It’s DaVinci.**

There’s no denying the beauty of natural slate and shake—the problems aren’t aesthetic. Issues arise in performance. The beauty of real cedar shake is fleeting; it is prone to damage and does not provide color stability. And unlike DaVinci, natural slate does not last a maintenance-free lifetime and cannot stand up to Mother Nature’s fury. When it comes to composite roofing, DaVinci Bellaforté reigns supreme and can perfectly mimic the allure of the real thing.

Asphalt, on the other hand, looks nothing like natural slate or shake; it is a pitiful imitation and powerless when compared to DaVinci Bellaforté.
